

DIAMOND DRILLING COMMENCES JOUMBIRA ZINC PROJECT, NAMIBIA

Tanga Resources Ltd (“Tanga” or the “Company”) (ASX: TRL) is pleased to announce diamond drilling has commenced at the Joubira Zinc Project (“Joubira” or “the Project”) in Namibia

The diamond drilling programme is initially planned for four holes totalling approximately 600m, **targeting shallow, high grade zinc-lead mineralisation.**

Core from the drilling programme will be cut prior to being transported to the Intertek Laboratory at Tsumeb for sample preparation, and then sent to Australia for assay.

Due diligence on Joubira continues and the Company looks forward to providing further updates shortly.

For additional information on the acquisition, please refer to the ASX announcement on 5 December 2017.

About the Joubira Zinc Project

Joubira is an advanced, high grade zinc-lead project, located in the highly prospective and well endowed Damaran Belt, Namibia.

Joubira is located in central Namibia, approximately 190km by sealed road from the capital, Windhoek and 400km from the port of Walvis Bay. The Project has excellent infrastructure with the major service town Otjiwarongo located 50km to the north with existing grid power and the national railway line is in close proximity.

The Project has had no modern day exploration, with the majority of historical exploration undertaken during the late 1970's and some limited follow up work in 2002.

Tanga has an option to acquire an update on the progress of the proposed acquisition of Coldstone Investments (Pty) Ltd, which has a joint venture agreement with Namibian government owned, Epangelo Mining Company (Pty) Ltd to earn in up to 80% (with the ability to increase to 90%) of Joubira.

Competent Person Statement

The information in this report that relates to the exploration results, geology and geophysical interpretation was based on material compiled by John Stockley. Mr Stockley is a Member of the Australian Institute of Geoscientists and is a Director of Tanga Resources Limited. Mr Stockley has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which was being undertaken to qualify as Competent Person as defined in the 2012 Edition of the JORC "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (the JORC Code). Mr Stockley consents to the inclusion in this report of the matters based on his information in the form and content in which it appears.
