About Argentina Mining Limited

Argentina Mining Limited listed on ASX on 9 March 2011. The Company is exploring a suite of five gold and base metal projects in San Juan Province, Argentina. These projects range from the established porphyry copper-gold-molybdenum project at Cerro Blanco, epithermal vein gold and copper mineralisation at Amiches, San Francisco and Tres Amigos and regional exploration projects near Barrick Gold Corporation's major Veladero (Reserves 12Moz Au) and Pascua-Lama (Reserves 17.8Moz) gold operations.

The Company's first 5 diamond core-holes drilled in two phases in 2011 at the Copper Hill Prospect at Cerro Blanco intersected broad zones of porphyry copper-gold-molybdenum mineralisation which, supported by results from geophysical Ground IP-Res and Magnetics surveys, confirm the presence of a large mineralised porphyry sulphide and oxide system. The company is planning follow-up drilling through mid-late 2012.
